

SMART HOSPITAL IMPLEMENTATION BID

Vendor: **Apex Digital Health**

Target: Ministry of Health (MOH)

Reference Code: APEX-MOH-2026-003

1. Statement of Understanding

Apex Digital Health acknowledges the Ministry of Health's objective to deploy a unified, secure, and highly available Smart Hospital Management System (RFP: MOH-RFP-2026-001). Our proposed cloud-native platform is engineered to eliminate data silos, automate complex clinical workflows, and provide actionable analytics for hospital governance.

2. Solution Capabilities & Functional Scope

Our platform delivers a 360-degree approach to healthcare management, fully compliant with the RFP scope.

Core Healthcare Operations

- **Patient & Records:** Complete EMR functionality, biometric-ready patient registration, and a dedicated mobile-responsive Patient Portal.
- **Booking Engine:** Algorithmic appointment scheduling with automated SMS/Email reminders, doctor availability mapping, and digital queue management.

Clinical & Ancillary Services

- **Clinical Workflows:** Digital treatment plans, e-prescribing, and diagnostic tracking.
- **Integration Ready:** Native HL7/FHIR support for seamless connections to Radiology (RIS) and Laboratory (LIS) systems.
- **Pharmacy Control:** Intelligent inventory forecasting, automated dispensing logs, and real-time alerts for drug allergies and interactions.

Finance & Analytics

- **Revenue Cycle Management:** End-to-end billing management, automated insurance claims processing, and digital payment tracking.

- **Data Intelligence:** Dynamic executive dashboards, operational KPIs, and predictive healthcare analytics.

3. Architecture & Compliance

Our system guarantees resilience and uncompromising data security.

- **Performance:** Guaranteed **99.95% SLA** uptime with robust disaster recovery protocols.
- **Security Standards:** Enforced Multi-Factor Authentication (MFA), strict Role-Based Access Control (RBAC), and AES-256 data encryption (at rest and in transit).
- **Scalability:** Cloud-enabled architecture designed to support multi-facility rollouts across the Kingdom.

4. Delivery Schedule

We propose a structured 10-month delivery roadmap to ensure quality and user adoption.

PHASE	DESCRIPTION	TIMELINE
Phase 1: Discovery & Blueprinting	Requirement analysis, gap analysis, and system design	1 Month
Phase 2: Platform Engineering	Customization, module activation, and EMR setup	4 Months
Phase 3: Interoperability	LIS, RIS, Insurance, and Government API integration	2 Months
Phase 4: Quality Assurance	SIT, UAT, load testing, and security auditing	1.5 Months
Phase 5: Launch & Enablement	Go-live, change management, and staff training	1.5 Months
Total Delivery Time		10 Months

5. Resourcing Strategy

Apex Digital Health will deploy a specialized task force of 13 experts.

ROLE	HEADCOUNT	FOCUS AREA
Program Manager	1	Delivery, risk management, reporting
Clinical Workflow Experts	2	Mapping medical procedures to software
Enterprise Architect	1	Cloud infrastructure and data modeling
Software & Integration Engineers	6	System build and third-party APIs
QA & InfoSec Analysts	3	Testing, cybersecurity, and compliance

6. Commercial Offer

Our pricing is structured to provide maximum value within the Ministry's budgetary constraints.

ITEM DESCRIPTION	COST (SAR)
Software Licensing & Cloud Infrastructure Setup	1,200,000
System Implementation & Customization	1,500,000
System Integrations (LIS, RIS, APIs)	700,000
Training, QA & Change Management	350,000
12-Month Support, Warranty & Maintenance SLA	400,000
Total Proposal Value	SAR 4,150,000

7. Closing Statement

Apex Digital Health is confident that our modern architecture, deep healthcare IT experience, and competitive commercial model make us the ideal partner for the Ministry of Health. We are ready to initiate this digital transformation journey upon award.
