

Technical Proposal

Smart Hospital Management System

Submitted To: Ministry of Health (MOH)

Submitted By: NextGen Healthcare IT

Proposal Reference: NGH-MOH-2026-002

Submission Date: June 2026

1. Executive Summary

NextGen Healthcare IT is proud to submit our comprehensive proposal in response to RFP MOH-RFP-2026-001. We understand the Ministry of Health's objective to unify fragmented systems, eliminate manual processes, and transform patient care through digital innovation. Our Cloud-Native Smart Hospital Management System is purpose-built to automate clinical and administrative workflows, ensuring a seamless experience for patients and optimized resource utilization for healthcare providers.

2. Proposed Scope of Work & Modules

Our solution fully aligns with the functional requirements outlined in the RFP, covering all critical hospital operations.

2.1 Patient & Appointment Management

- **Patient Portal & EMR:** Unified Electronic Medical Records, secure patient portal access, and complete medical history tracking.
- **Intelligent Scheduling:** Real-time online booking, waitlist automation, SMS/Email appointment reminders, and physician availability management.

2.2 Clinical & Pharmacy Systems

- **Clinical Documentation:** Standardized treatment plans, diagnosis management, and seamless integration with LIS (Laboratory) and RIS (Radiology).
- **Pharmacy Automation:** Automated prescription processing, real-time inventory tracking, and intelligent drug interaction alerts to ensure patient safety.

2.3 Billing & Financial Management

- **Insurance & Claims:** Automated insurance claims processing, billing management, and patient payment tracking.

- **Financial Reporting:** Daily revenue monitoring and reconciliation dashboards.

2.4 Advanced Reporting & Analytics

- **Executive Dashboards:** High-level KPI monitoring for hospital administration.
- **Regulatory Reporting:** Automated compliance reports aligned with MOH standards.

3. Technical & Security Architecture

We leverage cutting-edge cloud infrastructure to deliver a highly available, scalable, and secure platform.

- **Cloud Platform:** Hosted on scalable cloud infrastructure with **99.95% Guaranteed Availability**.
- **Integrations:** API-first architecture enabling seamless data exchange with existing LIS, RIS, and Government Health Platforms.
- **Security:** Implementation of Multi-Factor Authentication (MFA), Role-Based Access Control (RBAC), end-to-end data encryption, and comprehensive audit logging.

4. Project Implementation Timeline

Our project plan strictly adheres to the requested 10-month delivery schedule.

Phase	Key Activities	Duration
1. Assessment & Design	Requirement gathering, architecture design, and UI/UX mockups.	2 Months
2. Core Development	Module development, API creation, and database setup.	4 Months
3. Integration & Testing	Third-party integrations, UAT, and security penetration testing.	3 Months
4. Deployment & Training	Go-live, user training, and documentation handover.	1 Month
Total Project Timeline		10 Months

5. Project Team

We have assigned a highly qualified team of certified healthcare technology specialists with extensive experience in government IT projects.

Role	Quantity	Responsibility
Project Director	1	Overall project governance and MOH liaison
Healthcare Solution Architect	1	System design and workflow mapping
Senior Developers	5	Application and API development
Integration Specialist	2	LIS, RIS, and Government platform integration
QA & Security Lead	2	Testing, compliance, and security validation

6. Financial Proposal

Our competitive pricing model encompasses all software, services, and 12 months of post-deployment support.

Cost Component	Amount (SAR)
System Design & Architecture	550,000
Platform Development & Licensing	2,100,000
Integration Services (LIS, RIS, Insurance)	850,000
Testing, Deployment & Training	450,000
First Year Support & Maintenance	500,000
Total Estimated Budget	SAR 4,450,000

7. Conclusion

NextGen Healthcare IT is fully equipped to deliver a transformative Hospital Management System that not only meets but exceeds the expectations outlined in the RFP. We look forward to partnering with the Ministry of Health to drive digital excellence in healthcare.
